Developmental Services

People with developmental disabilities are three to four times more likely to experience mental health conditions than people in the general population. Using its expertise in the field of mental health, Mental Health Connecticut (MHC) provides services and supports to address the specific needs of people who are dually diagnosed with developmental disabilities and mental health conditions.

MHC supports this specific population with services that address the full range of mental health diagnoses in addition to intellectual disabilities. Services and supports are based upon individual needs, goals, and aspirations including, but not limited to:

- Housing and Individualized Residential Supports ranging from one hour per week to 24 hours, seven days a week
- Vocational Supports
- Community Connections and Recreational Engagement
- Health Care Coordination
